PROFESSIONAL SUMMARY

Software Engineer (Full Stack) with hands-on experience building end-to-end web applications using Django, the MERN stack, and relational/non-relational databases. Skilled in designing secure, scalable backend systems, developing RESTful APIs, and delivering responsive, user-centric frontends. Delivered national-scale, production-grade web portals for Government of India initiatives, including PRATHAM and Udyami Bharat 4.0, with a strong focus on performance, data security, and reliability. Quick to learn new frameworks, tools, and industry best practices.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, PHP, SQL

Frameworks & Libraries: Django, React.js, Node.js, Express.js

Databases: PostgreSQL, MySQL, MongoDB

Backend & APIs: RESTful API Development, JWT Authentication, Role-Based Access Control (RBAC), MVC Architecture

Frontend: HTML5, CSS3, Tailwind CSS, Responsive UI Design

Tools & Platforms: Git, GitHub, Nginx, Netlify, Vercel, pgAdmin, Visual Studio Code

Deployment & DevOps: Gunicorn, Environment Variables, Production Deployment, Windows Server Basics

Core Concepts: CRUD Operations, Database Design, Authentication & Authorization, Data Structures & Algorithms

WORK EXPERIENCE

Software Engineer (Full Stack) — PRATHAM, RPF National Project, Government of India

Lucknow, India | July 2025 – Present

- Architected and deployed a pan-India web portal for the Railway Protection Force (RPF), used across 15+ Zonal, Divisional, and Post-level offices to manage and analyze national training and HR aptitude data.
- Independently engineered 100% of the frontend, backend, and database layer using Django and PostgreSQL, following MVC and REST API design principles.
- Established secure, role-based authentication and access control (RBAC) covering 3 government user tiers (Zonal, Divisional, Post-level).
- Collaborated directly with the Inspector General (IG), RPF Lucknow, under the supervision of the Director General (DG), RPF, across 3 levels of stakeholder review to ensure compliance with national-level data security and performance standards.
- Optimized application performance, reducing average page-load time and delivering a polished, mobile-friendly UI used on 3+ device types (desktop, tablet, mobile).

Software Engineer (Full Stack) — Udyami Bharat 4.0, National Productivity Council (Atma Nirbhar Bharat Initiative)

Delhi, India | July 2025 – Present

- Engineered 5+ backend modules supporting Industry 4.0 objectives under the Government of India's Atma Nirbhar Bharat initiative using PHP and MySQL.
- Ensured application security, data integrity, and scalability across the platform, in alignment with government compliance and QA standards.

- Partnered within a structured, agile government development ecosystem, adhering to strict delivery timelines and QA processes across 4+ release cycles.

PROJECTS

PDF Setu — AI-Powered PDF Processing & Management Platform

- Built a Python/Django-based platform to upload, process, search, and manage large volumes (1000+) of PDF documents using AI and NLP techniques for text extraction and smart search.
- Created 10+ backend REST APIs for automated document parsing, categorization, and fast retrieval, cutting manual document search time significantly.
- Focused on processing accuracy, performance, and a simple, intuitive interface built for 3+ user roles, including non-technical staff.

AI Chatbot — Intelligent Query Assistant

- Developed an AI-powered chatbot using Python and NLP techniques to handle user queries and deliver instant, automated responses, reducing manual query-handling effort.
- Integrated the chatbot with backend APIs to enable context-aware, real-time interactions across 10+ query categories.
- Crafted conversational flows across 5+ intent types that improved user engagement and response accuracy.

Digital Library — Document Management System

- Established a full-stack Digital Library web application using Django and PostgreSQL to organize, categorize, and manage 500+ digital documents across 10+ categories.
- Implemented search, filtering, and RBAC across 3 user roles for secure and efficient document retrieval.
- Delivered a polished, user-friendly interface, tested across 3+ screen sizes for browsing and accessing library resources.

Personal Portfolio Website

- Deployed a personal portfolio website showcasing 5+ projects, technical skills, and contact information.
- Assembled a mobile-friendly UI across 4+ sections (home, projects, skills, contact) using modern web technologies, hosted via Netlify.

EDUCATION

B.Tech in Computer Science & Engineering

Vindhya Institute of Technology and Science, Satna (RGPV) | January 2022 – May 2026 | CGPA: 7.0 (up to 7th Semester)
